MUHAMMED FAHIM T

UNITY GAME DEVELOPER

📞 +91 7994846633 | 📧 fahim6t6@gmail.com | 🌍 Kerala, India

PROFESSIONAL PROFILE

Unity Developer with hands-on experience in gameplay programming, prototyping, testing, and deployment. Completed a six-month internship at Infocom Private Limited, contributing to mobile game development, multiplayer systems, and student mentoring. Passionate about building engaging, high-performance games for PC and mobile platforms using Unity and C#.

WORK EXPERIENCE

Junior Game Developer Intern & Students Mentor | Infocom Private Limited **APR 2026 - SEP 2026**

- Contributed to the development of a Google Play Store-published 2D Solitaire Collection game in Unity, featuring TriPeaks and Pyramid Solitaire modes.
- Engineered core card-game mechanics, including deck management, shuffle algorithms, drag-and-drop controls, auto-move functionality, undo system, and win-condition validation.
- Designed solvable game-generation systems using seed-based algorithms and multiple difficulty levels to provide balanced, replayable gameplay.
- Mentored students in Unity game development, delivering hands-on training in C#.
- Provided technical guidance on Unity projects, assisting with debugging, gameplay systems, and development challenges throughout the project lifecycle.

EDUCATION

Game Development Course **July 2024 - April 2025**
Bigboy Gaming School

Bsc.Computer Science **June 2021 - March 2024**
Majlis Arts & Science College (In progress)

Computer Science (Higher Secondary) **June 2019 - March 2021**
Valanchery Higher Secondary School

SKILLS

- Unity3D
- Unity2D
- Navmesh AI
- C#
- Unity Netcode
- Unity Relay
- Git
- Unity Animator
- Unity Animation

PROJECTS

TDM (Multiplayer System - Unity3D)

- Developed a real-time 3D multiplayer Team Deathmatch game in Unity using Netcode and Relay.
- Implemented room-code matchmaking with 1v1, 2v2, 3v3, and 4v4 team modes.
- Used a server-authoritative system to validate damage, scores, player state, and match results.
- Built synchronized movement, shooting, health, ammo/reload, respawning, and team scoring systems.

Solitaire Collection (Unity2D)

- Developed a 2D Solitaire Collection Game in Unity featuring multiple popular card game modes including TriPeaks and Pyramid Solitaire.
- Implemented complete card systems including deck generation, shuffling, drag-and-drop controls, auto card movement, undo functionality, and win
- Designed fully solvable game generation systems using seed-based algorithms with multiple difficulty levels for balanced and replayable gameplay.

ADDITIONAL INFORMATION

- **More projects and gameplay videos are available in portfolio.**
